

## **Colonel (Ret.) Scott Lambert Named Partner**

*Attain, LLC Board of Managers admits Scott Lambert to Consulting Firm's Partnership*

**VIENNA, VA – February 26, 2013** – Attain, LLC, a leading management, technology and strategy consulting firm, today announced that Colonel (Ret.) Scott Lambert has been admitted to its partnership effective March 1. Lambert joined Attain as a Senior Manager in May 2010 to focus on strategic initiatives for the firm's Department of Defense clients, specifically in the areas of enterprise solutions and logistics modernization. As a partner, Lambert will be responsible for the growth of Attain's Army ERP business within its Federal and Solution Services division.

“Scott brings profound knowledge in the Defense industry, with more than 30 years of experience serving the Army enterprise, said Manish Agarwal, president of Attain's Federal and Solution Services division. “As an essential leader at Attain, he is continually building deep and effective relationships across Attain's Federal client base and works tirelessly to position our company for continued growth.”

In his two years at Attain, Lambert has successfully built and led a team that continues to grow the firm's Army ERP business and won Attain's largest prime contract to date to support the Army's AESIP program. He has subsequently played an invaluable role in securing four of the five task orders that have been awarded under the AESIP contract.

“In addition to Scott's drive and dedication to Attain's success, he also exemplifies our culture which is rooted in our seven core values, The Attain Way,” said Greg Baroni, Attain's chairman and CEO. “He demonstrates these values not only in the way he delivers to our clients day in and day out, but also in the way he teams with colleagues and partners, always with the utmost humility, integrity, and an unwavering commitment to excellence,” said Baroni.

Before joining Attain, Lambert served as Project Manager for the U.S. Army Materiel Command (AMC) Logistics Modernization Program (LMP), responsible for more than 1,100 personnel at LMP. LMP is the Army's core initiative to modernize 30 year-old wholesale and retail logistics systems, business processes, and practices.

Lambert previously served as military assistant to the undersecretary of the Army; product manager in the Program Executive Office for Simulation, Training and Instrumentation; associate director of the Army's Joint Advanced Distributed Learning Collaborative Laboratory; and co-chairman of the Simulation-to-C4ISR Interoperability Overarching Integrated Product Team.
