

Delivering Value Through Cost Recovery

To overcome the complexities of cost recovery that face your institution, Attain has developed AttainSpace, a fully functional web-based application that allows you to compile, update, review and retrieve the data necessary to generate an accurate comprehensive space functional usage survey. Redefining the way space surveys are conducted, AttainSpace demonstrates Attain's distinctive history of innovation and its dedication to addressing the specific needs of the higher education, academic medical center and nonprofit research communities.

Transformative Results, Real Return

Performing an accurate, well documented space study is the first and most critical step toward ensuring recovery of the costs associate with your organization's sponsored programs. While administrative costs remain capped at 26 percent, facilities costs are uncapped. Therefore the greatest opportunity to increase facilities and administrative (F&A) cost recovery is usually through the performance of a space functional usage survey. Space functional usage statistics drive the allocation of most facilities related costs, including building depreciation, equipment depreciation, interest expense and operations and maintenance expense.

AttainSpace allows users access to a centralized, web-based application that provides a comprehensive solution for gathering support documentation, functional percentages, and generating space statistics to support the allocation of facility costs.

The tool enables institutions to significantly reduce inefficiencies associated with a paper-based survey process; ensure accurate results with integrated business rules and data validation; easily monitor survey status from a web browser - anywhere, anytime; export and upload data to all major F&A rate systems; customize AttainSpace for a tailored experience that meets your institution's individual needs; and save both time and money.

Intelligent Features

- Empower users with multiple data entry methods
- Perform automatic room transfers without administrator intervention
- Rapidly complete rooms with no sponsored activity using the AttainSpace Block Code feature
- Eliminate repetitive entry of supporting details with AttainSpace Copy Room feature
- Create detailed reports to review and audit survey results
- Generate accurate and thorough OMB Circular A-21 mandated reports
- Communicate seamlessly with survey administrators and participating departments with integrated messaging

Flexible Integration

There are three flexible delivery options for integrating AttainSpace:

1. With our professional services
2. As a subscription-based managed solution
3. Through an enterprise license agreement

Our managed solution eliminates significant investments in hardware and software, as well as the costs of equipment maintenance and hosting.

Attain also offers a diverse range of training, management and integration support, and consulting services to assist you throughout the F&A process, including assurance of a successful space study.

Proven Performance. Forward Thinking.

Based in McLean, Va., Attain is a leading management, technology, and strategy consulting firm comprised of innovative problem solvers who disrupt the status quo to change the world and improve the lives of those they serve. Powered by extreme automation, Attain leverages a holistic, agile, secure, and customer-centered approach to digital transformation, advancing our clients' missions across the education, nonprofit, healthcare, and government landscapes.
